Head Injury Criterion (HIC) & Gmax Testing

Safety is our first concern. That's why Sportsfield Specialties invests in rigorous testing to guarantee our products excel at safety. Our Zone Stadium Wall Pads make the grade by offering excellent player protection on the field -- Certified by 3rd party testing agencies!

HIC vs. Drop Height / Impact Velocity

Head Injury Criterion (HIC) is the internationally recognized measurement for the likelihood of head injury.

Gmax vs. Drop Height / Impact Velocity

Gmax refers to how much force our wall pads absorb and in return, how much is returned to the athlete.

ProZone® safely absorbs impact velocities up to 37% higher than BaseZone®
